

FAKRO®

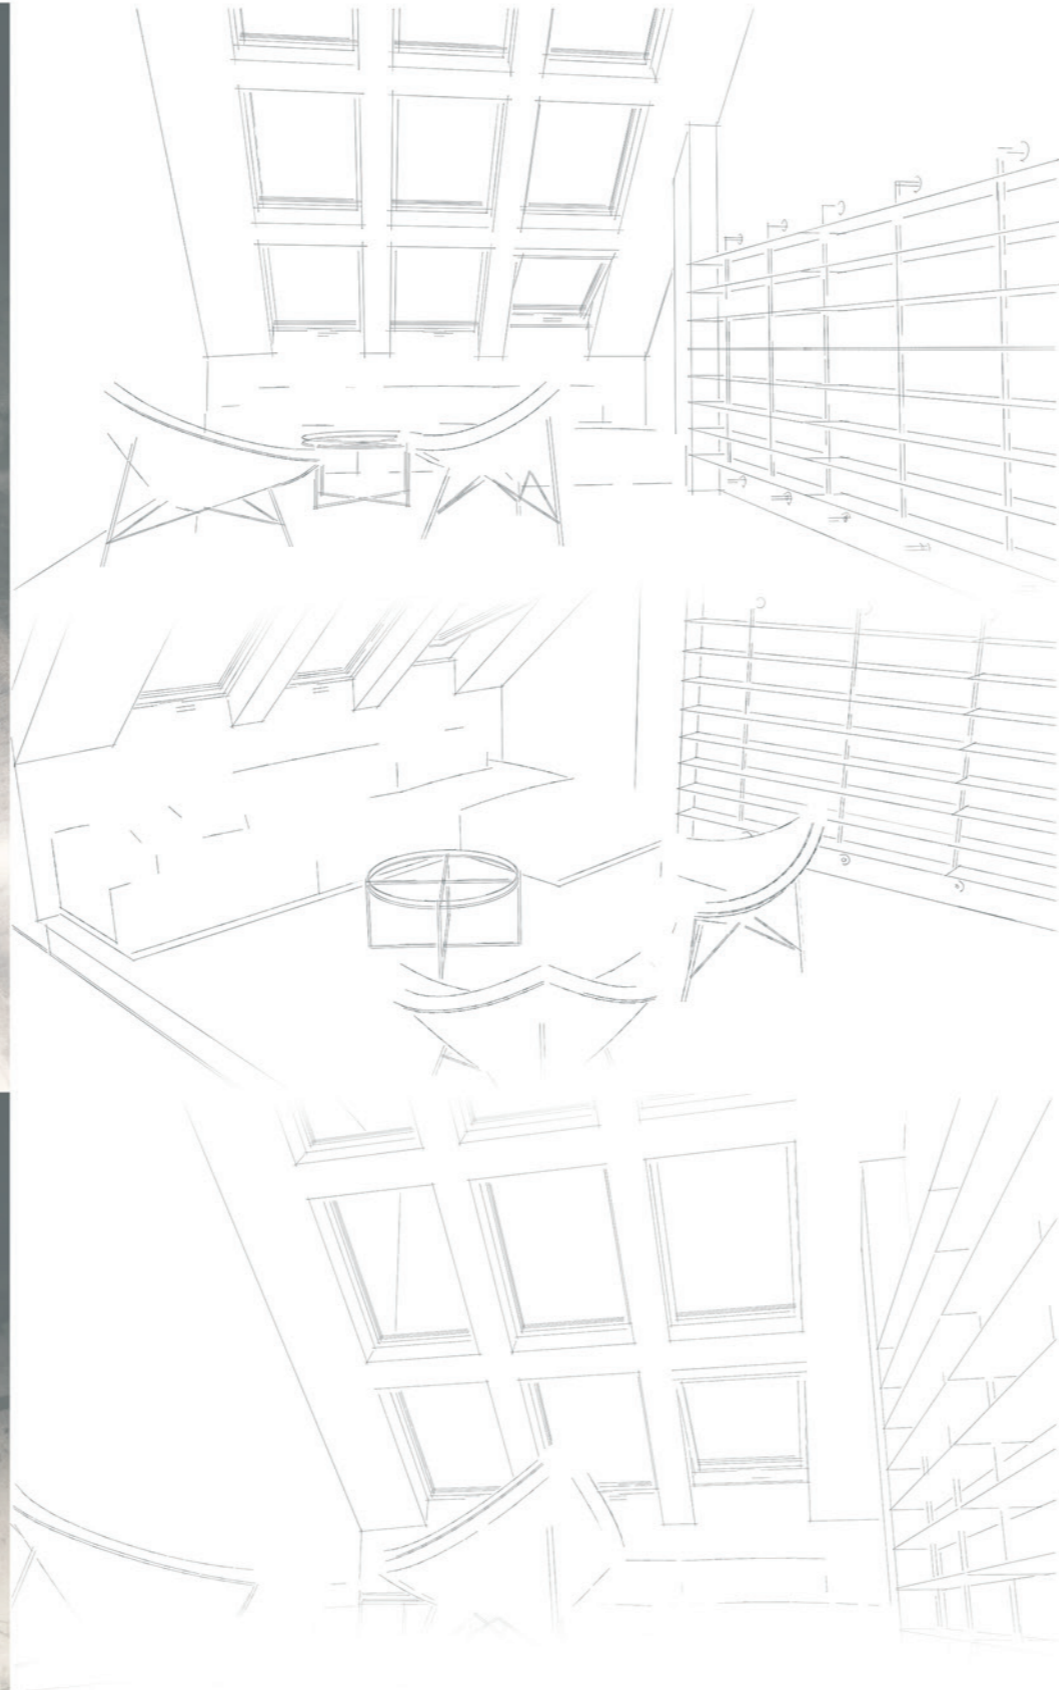

FUSION - BEFORE AND AFTER

INTERNATIONAL DESIGN COMPETITION

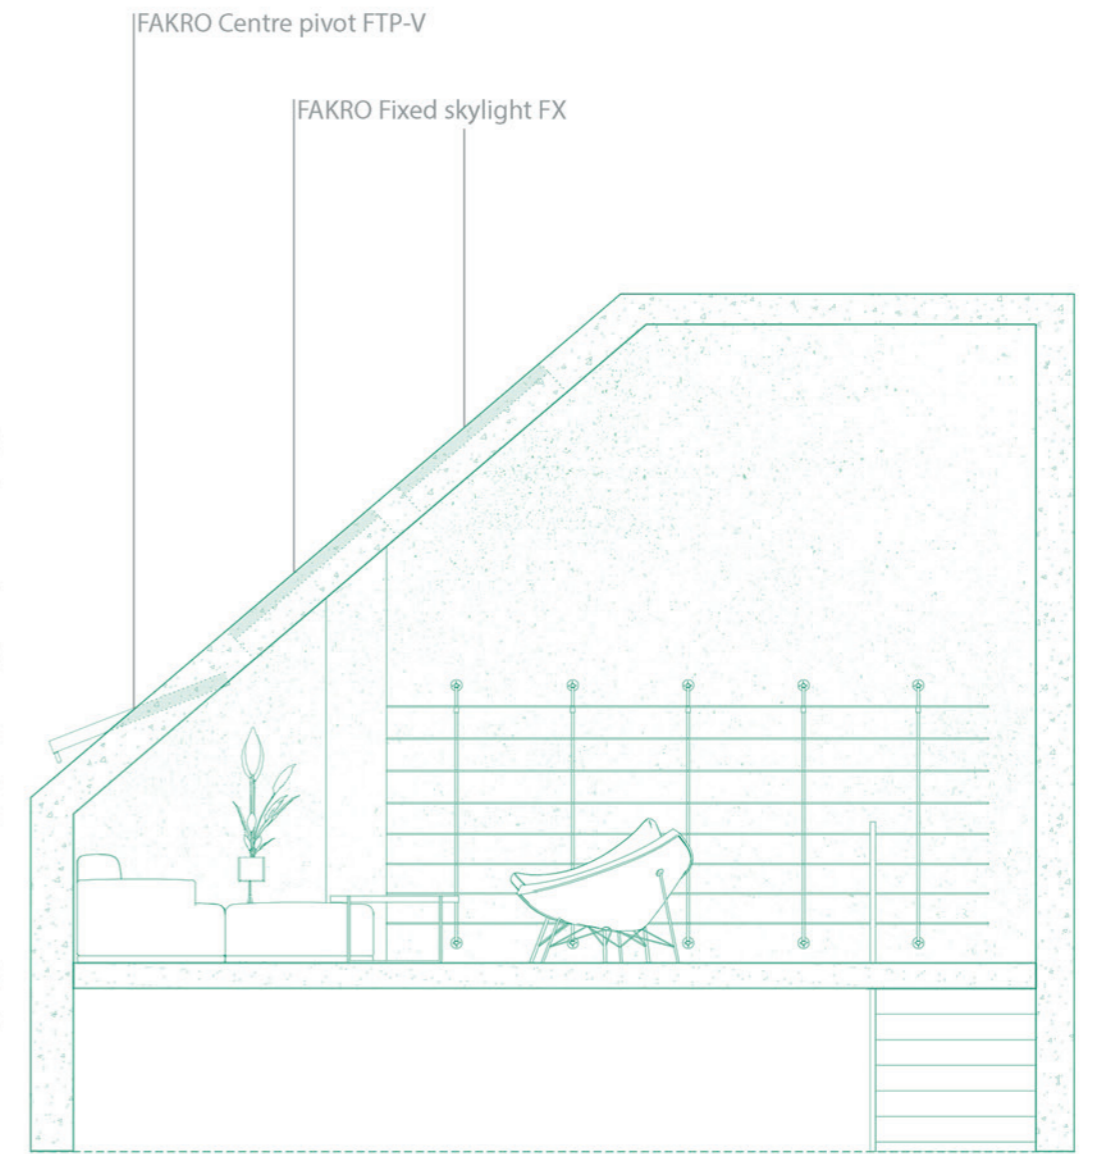

The space we have chosen for this competition is located in residential building in New Belgrade, Serbia. This loft is a part of an apartment but it has never been used, due to its lack of daylight, and it is used only as storage space. Our idea was to make this space more cosy and create functional lounge room by using FAKRO roof windows and bringing in the sunlight. By bringing in the daylight, every dark and forgotten space could become a pleasant place to live in.
